Outdoor Fireplaces and Fire Pits

An outdoor fireplace adds cozy ambience and warmth to any patio, extending the time you and your friends and family can spend outdoors.

Fire tables and fire pits add an element of warmth and style to the cool pavers of a patio.

Fire pits and fire tables can be customized to fit any style, from rustic to modern.

One of the key features of the space for this complete remodel is this stunning outdoor fireplace. When it comes to expanding available living areas here in Michigan, outdoor fireplaces and fire pits are key.

"We looked at bids from a number of stonescape/landscape installers...we are thrilled that we selected [MLP]. The crew that came out was highly skilled and paid close attention to detail. They took pride in their work and went to great lengths to make sure that the workmanship was very high quality. We were extremely pleased with the work and would highly recommend them."

"Had a beautiful patio and walkway installed. The team was hard working and professional...I really did not know what I wanted the space to look like....It turned out better than I could have imagined. I talked to several landscaping before choosing Michigan Landscape Professionals."

"...the crew at Michigan Landscape Professionals did a fantastic job on our backyard project. We had a mess of a yard with overgrown trees and uneven ground that we had been ignoring for years...They did an amazing job clearing trees and debris, built an amazing retaining wall, leveled and sodded the lawn, redirected irrigation, added stones beneath the deck, and installed a beautiful stone fire pit. I would definitely recommend them to friends and family."

Retaining and Boulder Walls

Boulder and paver retaining walls can not only be functional, but also beautiful and a stunning highlight to your property.

"Prior to contacting Michigan Landscape Professionals we had spoken with numerous other companies...I finally felt like I had found someone who had a true eye for design...They worked like crazy and were absolutely meticulous with every detail. There were no shortcuts and they went the extra mile to make sure everything was done right. I was speechless at the end of the project. I am typically very good at visualizing design concepts considering that is my profession, but I had no idea how beautiful the final product was going to be..."

..."I truly could not have been more pleased with the entire experience. I would recommend Michigan Landscape Professionals to anyone who is looking for a one of a kind, impeccable product with a professional and timely process."

Retaining walls can be made of many different materials for everything from a clean, modern look to rustic and natural.

Elements like landscape lighting and unique plantings are just the thing to soften the harder elements of retaining and boulder walls.

Paver Walks and Patios

Paver patios and walkways can not only be functional, but also beautiful. Whether it is a grand entranceway, a place to chat with friends, or a place to watch the sun set over the lake, these are always a highlight to any home.

Paver patios don't have to be a single level. Multi-level patios create space and depth between different use areas.

Combining different types of stone can also provide visual interest and create depth in a patio's design.

There are many different colors and types of paver stone to fit the taste and style of any home, creating a look that is intentional and natural.

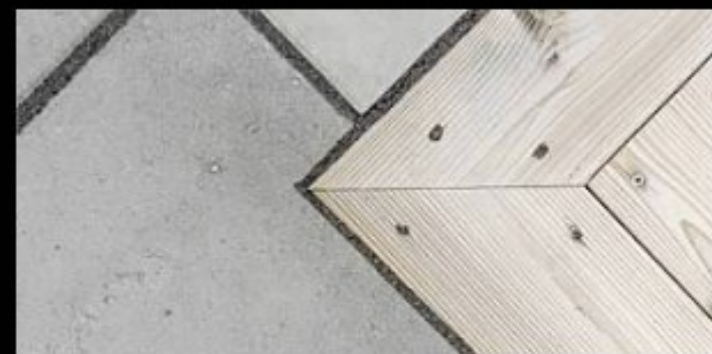

"We started our landscape renovation journey with Michigan Landscape Professionals last December...He created a fantastic plan for us, with the perfect blend of hardscape and plants. The communication was clear, everyone on the team was on the same page the entire time. Our crew was here every day, on time, and worked with great attention to every detail. Our job was completed in the exact timeframe that was originally estimated...We are very pleased with our completed project!"

Swim Spa Surrounds

Swim spas have become increasingly popular in the last few years, but it can be difficult to incorporate them into a landscape design. We have dedicated carpenters and expert designers who know how to work hand-in-hand with swim spa installers.

Outdoor Kitchens

Outdoor kitchens are the ultimate addition for those who love to entertain family and friends.

Whether sleek and modern or casual and comfortable, outdoor kitchens can be customized to fit any style with just the features you want.

Nothing beats a poolside cookout on warm summer nights, especially when you don't have to run back and forth to the house for supplies.

Carpentry

Landscape carpentry isn't limited to just decks; a stunning pergola or gazebo adds shade and a stunning vertical element to any design.

"It took us a long time to find the right company to work with that would meet our design ideas...We were very impressed with their expertise and are super happy with our pergola - it gives us the outdoor living vibe we were looking for!!"

"We loved the design process. It was so much fun thinking of different shapes, materials, and structures..."

"...the crew were great to work with and very accommodating. We enjoyed every minute of the project...In fact, we will give MLP the first shot at any of our future landscape projects. Do your research and have a vision in mind so that the team can help you bring that vision to life!"

Landscape Lighting

There is nothing that brings warmth and life to a stunning landscape installation like the perfect landscape lighting.

Landscape lighting is not just for safety...

...but also for beauty.

New Build Construction Landscaping

We had a full landscape job done by [Michigan Landscape Professionals], front yard and back yard, along with a brick paver walkway and patio...[they] did an awesome job designing and executing the job. We love it!"

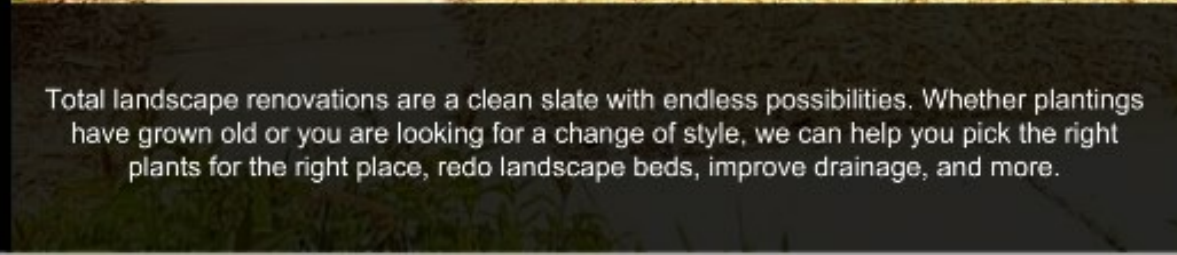

New builds are a blank slate, but that doesn't have to mean a dull and unimaginative landscape design.

Total Landscape Renovation

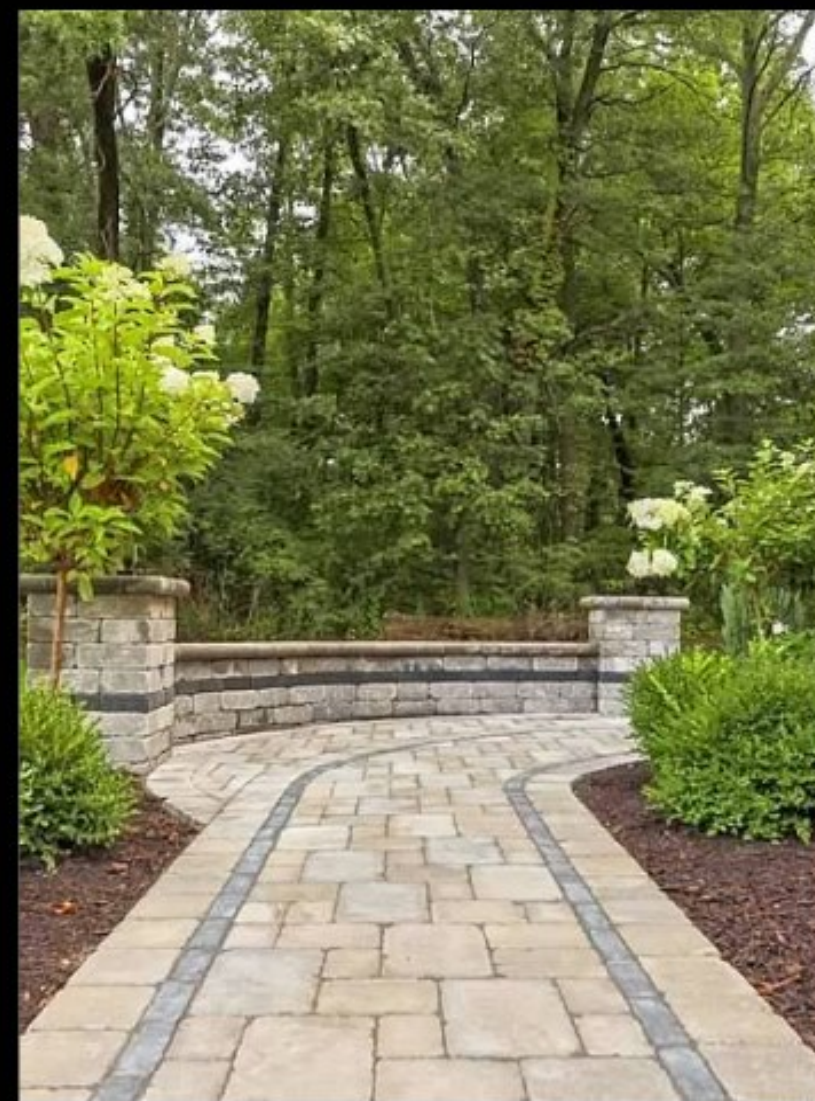

Total landscape renovations are a clean slate with endless possibilities. Whether plantings have grown old or you are looking for a change of style, we can help you pick the right plants for the right place, redo landscape beds, improve drainage, and more.

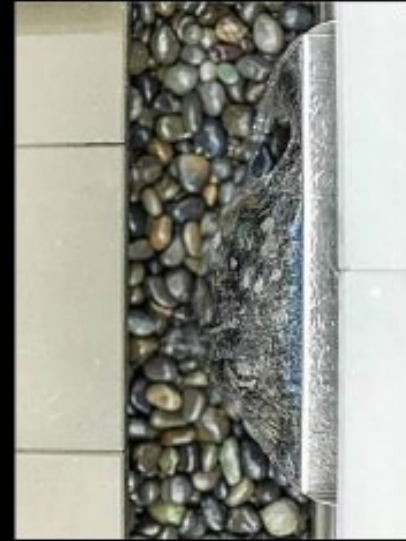

Whether you've just moved in or you've lived in your home for decades, sometimes a style refresh is just what's needed.

Sometimes starting with a blank slate can be overwhelming; our expert designers can incorporate multiple features into a seamless design that looks intentional without looking cluttered.

From outdoor kitchens, to paver patios and walks, to fire tables and fire pits, we do it all.
